                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence 6, Application US/08619491

Patent No. 6210670

GENERAL INFORMATION:
APPLICANT BEYS, Ellen L.
TITLE OF INVENTION: Specific for E-Selectin and P-Selectin NUMBER OF SEQUENCES: 10
CORRESPONDENCE ADDRESS: ADDRESSE: Townsend and Townsend and Crew LLP
STREET: Two Embarcadero Center, Eighth Floor
CITY: San Francisco
STATE: California
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Query Match 93.0%; Score 609; DB 4; Length 128, Best Local Similarity 93.0%; Pred. Sequence 52, Application US/09171945

Patent No. 627759

GENERAL INFORMATION:

APPLICANT: BENERY, Stephen

APPLICANT: Edge, Michael Derek

APPLICANT: Edge, Michael Derek

APPLICANT: Edge, Michael Derek

APPLICANT: Edge, Michael Derek

APPLICANT: Monoclonal Antibody to CEA, Conjugates Comprising Said

TITLE OF INVENTION: Antibody, and Thair Therapeutic Use in an Adept System

FILE REFERENCE: Monoclonal Antibody to CEA

CURRENT PALICATION NUMBER: US98-10-29

PRIOR FILING DATE: 1997-02-14

PRIOR PELICATION NUMBER: GB9703103.3

PRIOR PELICATION NUMBER: GB9603405.7

PRIOR APPLICATION NUMBER: DEF05-04

PRIOR APPLICATION NUMBER: DEF05-04

PRIOR PILING DATE: 1997-04-29

NUMBER OF SEQ ID NOS: 131

SEQ ID NO 52

LENGTH: 235
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 APPLICANT: Emery, Stephen
